

FINDLEY HOUSE  
FIREPLACES

Bespoke Fireplaces

# *Findley House Fireplaces are award winning designers and manufacturers of hand crafted fireplaces.*

Findley House Fireplaces have been handcrafting bespoke fireplaces for over 20 years. We pride ourselves on creating the dream fireplace for our customers by meticulously ensuring that every single detail is of the highest standard. Our approach to the service we provide is based on the values of professionalism, friendliness and reliability and this is why Findley House Fireplaces has been successfully making quality bespoke fireplaces for so many years.

Each fireplace is custom made by our highly skilled masons enabling us to offer outstanding choice in both design and materials unlike any other fireplace manufacturer.

Our materials are sourced from the best quarries around the world offering an extensive range of stone, slate, marble and granite. Many of these materials are exclusive to ourselves and are not seen on the high street. The projects we undertake are hugely varied giving Findley House Fireplaces a wealth of experience in an ever changing industry.

# Harrison

This simple micromarble fireplace boasts a two-tone stepped design and is enhanced with elegant downlights.

*Shown in: Diamond White & Grey Skies micromarble*

# Rembrandt

Meticulously carved from natural stone, its intricate details exude timeless beauty.

## *Shelby*

With its clean lines and minimalist design, this fireplace effortlessly blends into any interior decor.

*Shown in: Semi Rijou Limestone*

# Sutton

A traditional fireplace creating a timeless and classic addition to any home.

# Wragby

This remarkable Tudor style fireplace with hand carved features demonstrating Findley House craftsmanship.

*Shown in: Bateig Diamante Sandstone*

## Amelia

This profiled fireplace with stunning curves adds a touch of class and sophistication to any room.

# Avelyne

The Avelyne fireplace features a stunning contrast of natural marble, adding a touch of elegance and sophistication.

*Shown in: Diamond White micromarble with Emperor Silver*

# Phoenix

The Phoenix fireplace with distinctive Tudor arch feature adds an understated beauty to any home.

*Shown in: Snowfall Micromarble*

## Berkley

The sleek chamfered edges add a touch of modern elegance to this simplistic design.

Shown in: Grey Skies micromarble

# Harewood

A beautifully crafted fireplace with elegant curved detail adding depth to this traditional design.

## *Balmoral*

Boasting style and elegance, the Balmoral is a timeless beauty suiting both stoves and modern fires.

*Shown in: Semi Rijou Limestone & Honed Black Granite*

## *New Nexus*

The New Nexus fireplace keeps things simple with timeless appeal.

# Broadway

The Broadway stone fireplace is adorned with a large chamfer, adding a touch of elegance and dimension to this simple design.

*Shown in: Semi Rijou Limestone*

# Edessa

This stepped design adds depth & character to a simple surround creating an attractive focal point to any room.

*Shown in: Polar White Micromarble*

## *Flat Victorian*

The simplicity of this reproduction fire surround compliments both traditional and modern décor.

*Shown in: Semi Rijou Limestone & Black Granite*

## Media Wall

Stunning custom made media walls and bases in a variety of styles and finishes.

# Stove Hearths

At Findley House, our craft goes beyond the creation of fireplaces; we meticulously design and produce an exquisite array of hearths, panels, slips, and chambers, each crafted in a diverse range of shapes and materials. Elevate your space with our bespoke creations that seamlessly blend artistry and functionality.

# Materials

Findley House offer over 50 materials to choose from in a wide range of Limestone, Granite's, Slate's, Micromarble & Quartz. A full selection can be seen on our website at [www.findleyhouse.co.uk](http://www.findleyhouse.co.uk). Individual samples can be requested through your local stockist.

## Limestone

A popular choice for fireplaces due to its natural look & versatile nature, limestone is the most sought-after material for fireplaces today & available in several colours & variations. As a natural material, limestone may contain natural veins, fissures, fossils & variations in colour throughout which means each fireplace is completely unique. As a natural material this is suitable for use with solid fuel, high efficiency, gas & electric fires & stoves.

## Granite

Durable and non-flammable, it's no wonder that Granite is the number one choice for hearths in the UK. Granite is hard wearing, scratch resistant & available in a choice of colours with natural markings throughout. As a natural material, granite may contain variations such as fossils, fissures & colour variations throughout & is suitable for use with solid fuel, high efficiency, gas & electric fires & stoves.

## Slate

Another popular choice especially for use with stoves, slate is easy to clean & the colour can be enhanced over & over with the application of slate oil to enhance the natural characteristics inherently found in the beautiful natural material. A finish described as riven has a cleft surface which has been split by hand to create a unique piece every time. As a natural material, granite may contain variations such as fossils, fissures & colour variations throughout & is suitable for use with solid fuel, high efficiency, gas & electric fires & stoves.

## Natural Marble

Natural marble is exactly what most people assume it to be. Strikingly beautiful with natural colours & veining making each piece totally unique, some created over 200 million years ago. Natural marble certainly has the wow factor & is available in a huge choice of colours. Softer than granite, natural marble may better suited to creating a stunning surround to compliment a hardier hearth & panel or used to create feature slips to surround a hole in the wall fire. As a natural material, marble may contain variations such as fossils, fissures & colour variations throughout & is suitable for use with solid fuel, high efficiency, gas & electric fires & stoves.

## Micrograin/Micromarble/Conglomerate

Micrograin, also known as micromarble or conglomerate is a man-made marble comprised of crushed marble mixed with a resin to create a uniform effect which is suitable for use with electric fires & decorative gas fires. Being man-made gives an enormous amount of choice when it comes to the colours available. However, due to the high resin content, Findley House do not recommend the use of these materials with high efficiency gas fires or solid fuel fires.

## Quartz

Another man-made material made up using quartz, various pigments and resin to create a uniform material which, like micrograin, gives a large choice of colours and finishes available. Although replicating natural granite, the inclusion of resin renders quartz unsuitable for use with high efficiency gas fires or solid fuel fires.

## Notes

- Findley House will endeavour to meet all measurements as stated, however; due to the nature of the manufacturing process, a tolerance of up to 10mm will be considered acceptable. Findley House reserve the right to change sizes without prior notification.
- Other material, hearth & edge options are available. Please contact the office for further details.
- Images are for illustration purposes only
- Please note that all samples are to be used as a guide, as colour, natural fossils, fissures, markings, colour and shade variations will occur and will not be considered a fault. Findley House will not accept rejections or returns based on any of these expected variations found in natural materials.
- All fireplaces & surrounds are supplied with a 1" rebate as standard unless otherwise requested
- All Findley House products must be fitted by a qualified installer. It is the responsibility of the retailer to ensure that all items are installed correctly & safely.
